DEMOLITION GLOVES

Finally!

A glove solely designed for demolition!

When you are doing demo, you are often...

- Using a large demo bar, so you need padding on your palm to prevent blisters.
- Using the demo bar and other tools, you need the top protection to be supply enough to allow your fingers to wrap the demo tool.
- The top of your hand is continually coming in to contact with sharp objects as you swing and strike.

With that in mind we gave our glove..

- Gel padding on the palm and a reinforced thumb crotch
- Flex separations in knuckle TPR
- Impact TPR on knuckle and top of hand

Here are a few things about the gloves:

- Gel Foamed palm designed to relieve pressure from tool pushing
- Thumb and index finger contain "Touch Phone Compatible" technology
- Cut 5 Level protection
- EN388 Puncture protection
- Spectra lining
- 4 way stretch spandex back for comfortable fit
- 4mm foam with lining
- Impact absorption for metacarpal protection
- TPR on fingers knuckles and carpal bone area
- Abrasion resistant reinforced thumb crotch
